Executed a contract at DFCCIL Project associated with Tata Projects Ltd, work including supply of Huge Quantity of Construction Equipment on RENT

WHY EQUIPMENTS ON RENT?

NO MAINTENANCE COSTS

A construction equipment rental company performs all repairs and maintenance on the equipment. This cost is not absorbed by the renter and this is stated right in the rental agreement.

NO STORAGE COSTS

All equipment is stored in facilities that are managed by the rental company. It is delivered to and from the renter's place of work.

NO CAPITAL INVESTMENT

Renting frees up a company's business capital. Expenses are only incurred during the time the equipment is needed. The money saved can then be used towards other areas.

INCREASE BORROWING POWER

Any equipment rented by a company will not appear as a liability. It actually increases a business's ratio of assets to liabilities. Only the Newest Equipment is used. It doesn't take long for a piece of machinery or equipment to depreciate in value. This worry is eliminated by renting rather than purchasing expensive machinery.

TRY IT BEFORE YOU BUY IT

By testing a particular piece of equipment, a renter can be assured that they are using the proper machinery for the job that needs to be done before actually purchasing it.

AT ACCURA, WE OFFER OUR CLIENTS THE ABILITY TO:

- 🚧 Optimize Balance sheet efficiency.
- 🚧 Budget and control maintenance costs.
- 🚧 Eliminate concerns on storage and logistics.
- 🚧 Eliminate equipment obsolescence and depreciation.
- 🚧 Assured trained manpower at all times.
- 🚧 Increase safety and efficiency.

ASSURANCE

- 🚧 Young, modern Fleet.
- 🚧 Availability of trained, skilled operators.
- 🚧 Intensive fleet maintenance and up gradation programme to ensure minimal downtime.
- 🚧 Ability to tailor-make operating lease packages to suit your requirements.
